34 th Argos Operations Committee Meeting

Prepared by SAI

Date : June 7, 2000

SERVICE ARGOS INC. PROMOTIONAL ACTIVITY REPORT

1999 Highlights

Since the last Ops Comm in St Malo, France (June 23 – 25), Service Argos, Inc., participated in the meetings and conferences listed in the attachment. In partnership with science, Service Argos continues to direct promotional toward symposia that attract national and international government and other non-profit attendees involved in science applications. Excepting the JTA Meeting, the last half of 1999 was devoted to ocean science.

2000 Highlights

As noted on the attachment, ocean science will continue to receive good coverage from our promotional efforts. SAI has participated in 4 oceans related conferences so far this year, with 2 – 3 being considered during the remainder of 2000.

Biological applications, though comparatively small, continues as the fastest growing application for Argos. Hostile and remote environment monitoring of wildlife have brought about a number of Argos' technological improvements, so we continue to pay attention to the requirements of this application. SAI presented a poster at the heavily attended Sea Turtle Symposium (Feb, Orlando, FL). We plan to participate through a paper or poster at the International Symposium on Biotelemetry or the Technology in the Wildlife Profession (perhaps both), later on this year.

In total, SAI was involved in 11 science-related events during the period June '99 to June '00.
